

Direct Access Lab Testing (DALT)

Encouraging and enabling consumers to take more responsibility for their own wellness and disease prevention is a basic aspect of health care reform.

Direct Access Testing allows individuals who want more control of their own health care the capability to have laboratory tests performed without a physician order.

Direct Access Testing is ideal for those patients who do not have health care insurance, or have high insurance deductibles and co-pays.

Madelia Health is a Joint Commission and CLIA accredited facility, meeting all federal and state laws/regulations.
